Introductory

The construction industry is a vital sector in UAE in general, and in Sharjah in particular. It contributes about 9.9% of GDP growth, as it is one of the most important sectors that support sustainable economic growth. It also forms the cornerstone for developing the infrastructure necessary for economic and social development, which results in attracting many investments and enhancing the competitiveness of the economy by providing investment opportunities in construction projects, real estate development and other sectors. This sector achieved a remarkable growth throughout the past years, establishing its role as a major factor in driving economic growth in the UAE. It was supported by the introduction of qualitative projects by the government and the private sectors to keep pace with the increasing population growth and attract foreign investments. Also, Sharjah witnessed a growth in its gross domestic product

during the year 2023 by 6.5%, reaching 145.2 billion dirhams, compared to 136.4 billion dirhams in 2022, which recorded a growth rate of 4.9% compared to 2021. This is based on the results of the economic survey that Sharjah Department of Statistics and Community Development conducted between 2017 and 2023. This survey indicates a development that reflects the emirate's economic momentum and competitive capabilities and consolidates the position of Sharjah's economy among the most developed and diversified economies in the region. It should be noted that Sharjah's GDP data demonstrates the strategic development in the emirate's economic structure, and shows the acceleration of economic diversification efforts and reliance on non-commodity sectors, which are essential pillars for a more sustainable and growing economy, as the construction sector recorded a growth of 7.7% during 2023.

BUCOMAC Blocks & Interlocks

Bucomac, the Leading Excellence and Innovation in Sharjah's Construction Landscape. Since its inception in 1976, Bucomac has evolved from a family-run enterprise with a single mould to a construction powerhouse. Presently producing over 50,000 blocks daily and 2000 m2 interlocks across state-of-the-art facilities, the transformation underscores visionary leadership, strategic planning, and modern management.

Bucomac's success hinges on two pillars:

Human Excellence: With a dedicated workforce of 300 professionals, Bucomac prioritizes nurturing talent. Encouraging employees to maximize their potential fuels the company's growth.

Technological Advancement: Bucomac remains at the forefront of technology, swiftly adapting to industry trends. Advanced machinery streamlines production, enabling prompt responses to changing demands and ensuring quality remains uncompromised.

Bucomac's ability to foresee market needs and embrace innovation has yielded concrete blocks that exceed expectations in both functionality and aesthetics. This ingenuity empowers architects, consultants, and developers to materialize groundbreaking projects. Backed by stringent quality control and automated production, Bucomac consistently delivers products meeting the highest standards. Over four decades, their excellence has translated into an impressive portfolio, symbolizing their commitment to quality.

ARDECO

“Ardeco” factory was established in 2000, using a small number of equipment and workers. However, because of passion, the factory grew rapidly, as it rented a larger place and the number of the workers increased to twenty ones. In 2013, a special building was built for the factory with funding from Khalifa Fund for Enterprise Development, and the administrative and professional staff was completed. The factory now has approximately sixty workers and employees.

The factory is distinguished by its diverse products, including doors and decorative works in all its forms, in addition to the various and high-quality furnishings. The factory also participated in many specialized exhibitions and events, such as the Wood Exhibition in Dubai, Expo Center Sharjah, and Dubai Design Week exhibition in Dubai Design District. In the future, the factory aspires to build a brand name that resonates with everyone locally, regionally and globally.

SAFE MIX Ready Concrete L.L.C.

Safe Mix was established in 1998 to cater the booming construction and related activities in the UAE. The company was established by the Managing Director of UNEC-Safe Mix, Eng. A Halim Muwahid. Safe Mix operates 11 fully customized batching plants at 5 locations (Jebel Ali, International City, Sharjah, Hamriyah Free Zone and Showka) and an upcoming one in Nashama. Safe Mix's prime objective is to provide high quality ready mix concrete to its customers. Safe Mix Ready Concrete has been trading in Dubai and Sharjah for many years and managed to capture fair share of the ready-mix concrete

market and attained an excellent reputation for supplying quality concrete to various sectors in the market. During the short span of time, Safe Mix Ready Concrete has supplied millions of cubic meters of concrete to various prestigious projects such as towers, bridges, dams, reservoirs, mosques, villas, roads, etc. Safe Mix Block Division is ideally located in Jebel Ali Industrial Area No. 3 and concentrating on block products. The state of the art plant revolutionized the quality and variety of products being produced for the construction and infrastructure section of the region.
